

Log Chest build instructions

Before you commence the assembly process, we recommend that you read these instructions thoroughly beforehand to familiarise yourself with the assembly process and to also check that you have the correct components.

We highly recommend that any assembly is carried out on a flat, level surface if possible and that you use another person to assist you if necessary.

You can check our **YouTube channel** for assemble video, click on the link below:

dd

Step 1

Ensure that you have all of the correct parts as listed on the front page of these instructions, including any fixings.

Step 2

Place the back on the spacers and position the left-hand panel.

Step 3

Line up as shown and secure using the supplied screws through the pre-drilled holes.

Step 4

Drop the base into the slot in the side panel.

Step 5

Position the second side.

Step 6

Line up as shown and secure using the supplied screws in the pre-drilled holes.

Step 7

Move the spacers to the front of the Log Chest.

Step 8

Position the front panel.

Step 9

Line up the front panel and secure using the supplied screws through the pre-drilled holes.

Step 10

Drop the lid into position and centralise.

Step 11

Secure the back roof rail using the supplied screws through the pre-drilled holes.

Step 12

Complete on other side.
