

Robofex Craftsman/Jewellers Workbench

Before you commence the assembly process, we recommend that you read these instructions thoroughly beforehand to familiarise yourself with the assembly process and to also check that you have the correct components. If for any reason you need assistance, you can find our contact details on the top of the page of these instructions.

We highly recommend that any assembly is carried out on a flat, level surface if possible and that you use another person to assist you if necessary **for your convenience all guide holes are pre-drilled.**

You can check our YouTube channel for assembling the video.

Package contents

- 1x Tabletop
- 2x Legs
- 2x Bundle with panels for the drawer frames
- Bundle with drawers
- 1x Lower shelf
- 1x Bundle with fixings and required support panels

Tools required

Spanner or battery-operated drill
PZ3 BIT

Step 1

Ensure that you have all the correct parts as listed on the front page of these instructions, including any fixings.

Step 2

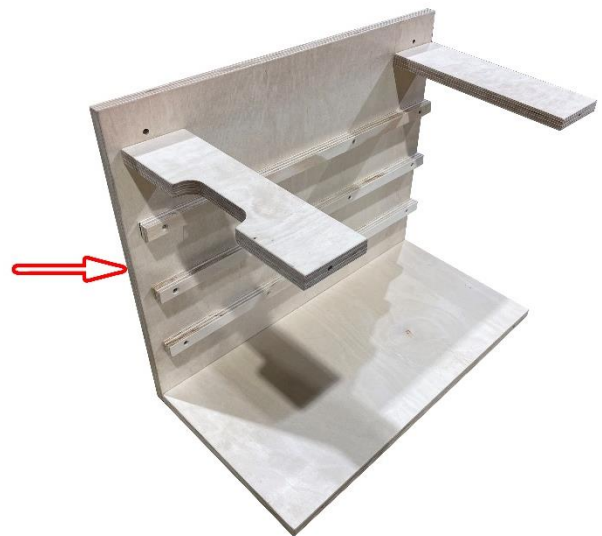

Start your assembly with the panel which is shown in the picture. ****Please note you can recognize panels front and back by batten position. At front of the panel, you can see some free space from battens to the edge of the panel – that is the front. ****

Step 3

Take the panel from the step 2 and attach the second panel which is shown in the picture with the confirmat screws.

Step 4

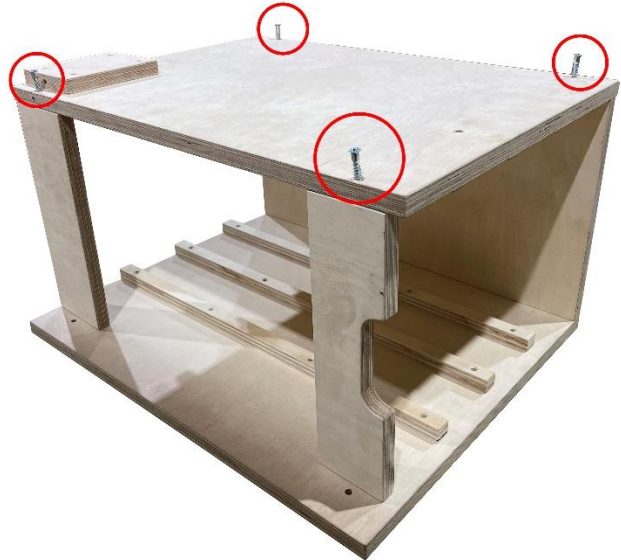

Rotate your assembly as shown and attach 2 of the connecting panels at the lower pilot holes leaving the top holes free. ****Please note while attaching two of the middle panels on your assembly that the routed panel should go in the front. FRONT IS MARKED IN THE IMAGE****

Step 5

Rotate your assembly as shown.

Step 6

Place the panel which is shown in the picture on your assembly and secure it with the confirmat screws.

****Please note that the front of your assembly must have some free space just as shown in the picture. ****

Step 7

Repeat steps 2-6 to finish assembling the second side as well. After both sides are completed put them one to each other just as shown in picture leaving some free space in the middle.

Step 8

Now place the lower shelf between two of your assemblies as shown in the picture making sure that the routed side is facing the front. Secure the shelf with the 4x confirmat screws from both sides.

Step 9

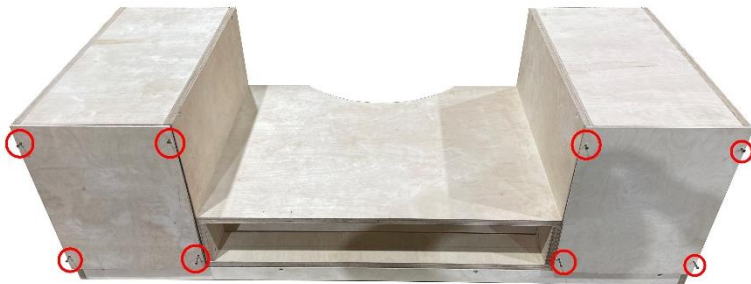

Take the panel which is shown in the picture and secure it with the confirmat screws

Step 10

Place the tabletop on your assembly make sure that it's perfectly aligned and secure it with 4x Confirmat screws.

Step 11

Rotate your assembly as shown in the picture. Take two of the backboards place them in position and secure them with the provided screws.

Step 12

Now take the rear board place in the position which is shown and secure it with the confirmat screws.

Step 13

Please unbox the legs package and start assembling your Robofex adjustable legs. **You will find the legs assembly instructions inside the package.**

Step 14

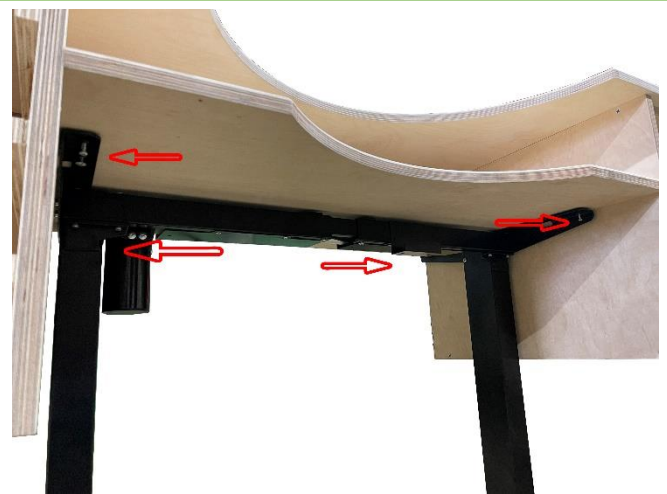

After assembling the legs, please adjust the legs width to its minimum size that you would be able to fit your assembly on top.

Step 13

Take your assembly and place it on already assembled height adjustable legs.

Step 14

Make sure that the rear of the worktop is aligned with the edge of the legs and secure them with the provided screws.

Step 15

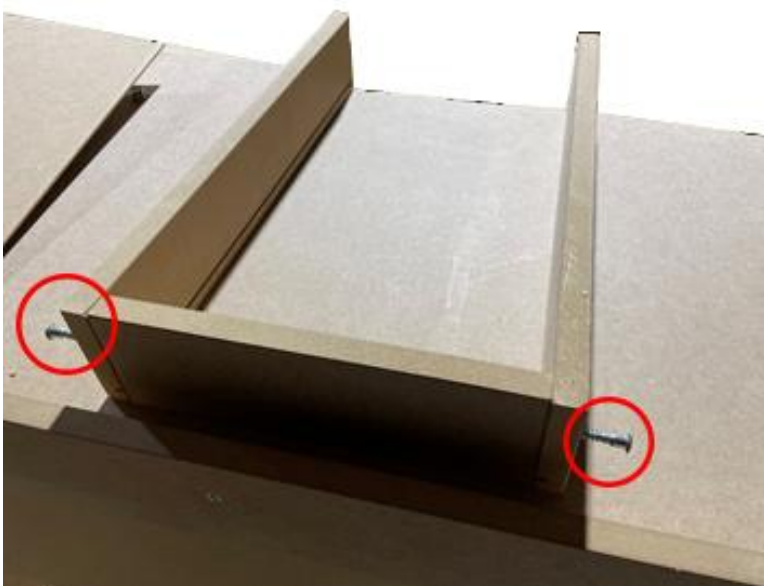

Take the height-adjustable remote and secure it to the side which is more convenient for you. (Please continue to step 16 for the drawer assembly).

Step 16

Take two of the provided drawer panels and place them in the same position as shown in the picture.

Step 17

Attach the drawers back panel that the cut out for the board would be facing the same direction. And now secure it with the confirmat screws.

Step 18

Slide the drawer's baseboard as shown in the picture.

Step 19

Now place the drawers front panel and secure it with the cam locks from each side. Repeat steps 16 to 19 to finish assembling the rest of the drawers.

Your Robofex Craftsman/Jewellers Workbench is now completed!
